Other Information

This project was initiated under Government of India's "Urban Infrastructure Development Scheme for Small and Medium Towns" (UIDSSMT) under the JNNURM programme. The project involved:

- Inspection of water supply, underground drainage, materials, mechanical and electrical equipment etc.,
- Reviewing the design, drawings, estimates and advising changes or deviations wherever necessary
- Conducting quality control tests for materials at site as specified in IS codes
- Verification of Action Taken Reports (ATRs) submitted by the Implementing agencies and submission of appraisals to APUFIDC.
